🐙 github.com/Abhishek-bo — 📍 Greater Noida, India

Skills

- **Programming Languages:** Java, Python, C, SQL
- **Engineering:** Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Operating Systems, Software Engineering, System Design
- **Cloud, Tools & Technologies:** AWS S3, AWS Rekognition, AWS Lambda, AWS DynamoDB, AWS API Gateway, AWS EC2, Git, GitHub, REST APIs
- **AI & AI Tools:** OpenAI, ChatGPT, Groq, Qdrant, OpenCV, NumPy
- **Operating Systems:** Windows, Linux
- **Familiar With:** HTML5, CSS3, JavaScript, React.js, MySQL, Spring Boot, Docker, FastAPI

Academic Projects

AI Face Recognition System using AWS

- Developed a real-time React monitoring dashboard to manage and monitor multiple camera streams, display live face-recognition results, track recent recognition events with camera and timestamp details, and provide a centralized view of overall system activity
- Built a multi-camera face recognition platform using Python, FastAPI, OpenCV, React, and AWS Rekognition
- Implemented face registration and recognition to identify known users, detect unknown faces, and record recognition events with camera and timestamp details

Multimodal Lecture Companion

- Developed an AI-powered lecture companion that analyzes educational video content and provides contextual AI-generated results
- Built a FastAPI backend using Groq for low-latency AI processing and Qdrant for vector-based semantic retrieval of relevant lecture information
- Implemented streaming responses to progressively deliver AI-generated results to the React.js frontend, reducing perceived waiting time and improving application responsiveness

UPI Without Internet

- Developed a UPI-based payment application focused on enabling digital payment workflows in environments with limited or unavailable internet connectivity
- Built the backend using Java and Spring Boot with REST APIs for handling payment requests and transaction workflows
- Designed an offline-oriented payment workflow with transaction validation and secure communication, with a lightweight frontend for initiating payments and displaying transaction status

Certifications

- **Java Full Stack Developer** – AICTE EduSkills Virtual Internship (Apr 2025 – Jun 2025) – [View Certificate](#)
- **Networking** – AICTE Cloud & Automation Academy (Oct 2024 – Dec 2024) – [View Certificate](#)
- **Introduction to Packet Tracer** – Cisco Networking Academy (May 2024) – [View Certificate](#)

Education

B.Tech. in Computer Science and Engineering

2022 - 2026

Galgotias University, Greater Noida, Uttar Pradesh

Competitive Programming

- **LeetCode:** Solved problems (arrays, strings, trees, dynamic programming) with optimized solutions
- **GeeksforGeeks:** Completes in various coding challenges focused on algorithm optimization
- **GitHub:** Maintain repositories for Java, web development, and algorithm implementations
